

Timely Tip from Cornelius Nursery for June Gardeners:

Enjoy Summer Color

Spring flowers become but a memory as summer heats up! However, our desire for a colorful landscape can still be achieved. From annuals to perennials to shrubs to trees, color is found in blooms, foliage and even in the plumes of ornamental grasses.

The distinct patterns of Caladium leaves or textured foliage of Coleus adds interest to shady gardens. The dazzling Daylily or drought-tolerant Lantana provides splashes of blooms for full sun. Crape Myrtles are sending forth sprays of blossoms and the Esperanza displays clusters of bell-shaped flowers. Color abounds even in the heat of summer!

Remember to use **Calloway's premium soils and mixes** at the time of planting and water well with a Root Stimulator mixture. Also, add two to three inches of mulch to conserve moisture, help keep the soil cooler and prevent weeds from growing.

Attend our **Free Saturday clinics**, especially June 6th which features the summer blooming Crape Myrtle. For a complete listing of clinics, visit www.mytexasgarden.com.
